SUMMARY

Computer Science Engineering student at MLR Institute of Technology with hands-on experience building and shipping software and hardware-software integrated solutions. Proficient in Python, C, and AI-assisted development, with exposure to deep learning, full-stack web, and IoT. Mentored 30+ students and shipped a production application for an institutional client.

SKILLS

Programming: Python, Java, C, JavaScript, TypeScript, Vibe Coding (AI-assisted development)
AI & ML: PyTorch, Transfer Learning (ResNet), scikit-learn, Grad-CAM, Computer Vision
Web & Frameworks: React, Next.js, Vite, FastAPI, Supabase, Tailwind CSS, Unity (C#)
Design & Tools: AutoCAD, Fusion 360, 3D Modelling, IoT Systems, Augmented Reality

EXPERIENCE

Centre for Innovation and Entrepreneurship – MLRIT Dundigal, Hyderabad
Technical Mentor *August 2025 – Present*

- Scaled a technical upskilling program for 30+ students across IoT, vibe coding, CAD, and additive manufacturing, achieving a 40% improvement in project delivery rate.
- Built and shipped a production application for CIE-MLRIT using Python and AI-assisted development, serving 30+ active institutional users.
- Drove cross-functional mentorship across hardware design, software, and fabrication tracks, enabling student teams to ship integrated solutions end-to-end.

PROJECTS

Workshop Carnival Chatbot | ***React, Vite, FastAPI, Gemini 2.5 Flash*** 2026

- Built and deployed an AI assistant for MLRIT's Workshop Carnival, answering attendee queries on schedules, registration, and event details via a React/Vite frontend and FastAPI backend.
- Implemented retrieval-augmented response generation with Gemini 2.5 Flash, indexing event content as searchable text chunks for context-grounded answers; live at wc.mlritcie.in.
- Repository: github.com/Tribhuvan-26/wc-chatbot.

DermAI – Skin Cancer Detection System | ***Python, PyTorch, FastAPI, React*** 2026

- Built a dermoscopic image classifier on HAM10000 using ResNet50 transfer learning, achieving ˜85% validation accuracy and ˜0.93 macro AUC across 7 lesion classes.
- Integrated Grad-CAM explainability and shipped a React + FastAPI app with drag-and-drop uploads and real-time confidence visualizations.
- Repository: github.com/Tribhuvan-26/Skin-cancer-classification.

AuraLoop – Gen-Z Fintech Savings App | ***React, Vite, Tailwind CSS, Capacitor*** 2026

- Built a cross-platform personal finance app that rounds up everyday transactions to the nearest Rs. 10/20/50, channeling spare change into user-defined savings goal jars.
- Implemented on-device Android SMS parsing to auto-import bank transactions (HDFC, SBI, ICICI, Axis, Kotak) with zero server uploads, alongside a weekly "aura score" spend-health summary.
- Repository: github.com/345678o/finance-controller.

EDUCATION

MLR Institute of Technology Dundigal, Hyderabad
Bachelor of Technology in Computer Science Engineering *2024 – Present*

Sri Chaitanya Junior College, DD Colony — Intermediate (MPC) *2022 – 2024*
Indu International School, Nagole — Matriculation (SSC) *2022*

ACHIEVEMENTS

Best Seminar Speaker Certificate, MLRIT *2024*
Runner-up – Innovation Challenge, MLRIT *January 2025*
Runner-up – AI Bower Hackathon *2026*
Languages: English, Hindi, Telugu
